Elias Furst

Houston, TX • eli@sfur.st • https://elia.sfur.st

Summary

Professional software engineer with experience in financial technology. Proficient in several programming languages including Python, Java, C++, and JavaScript. Experience with artificial intelligence (AI), DevOps pipelines, and web/app development. Skilled in industry-standard tools and frameworks such as React.js, Node.js, Jira, Github, and cloud databases.

Work Experience

Software Developer

JP Morgan Chase - Houston, TX — May 2026 to Present

- Developed an AI-powered DevOps automation tool to increase the efficiency of PR reviews
- Improved UX on internal business applications
- Maintained and upgraded business-critical high-volume trading applications

Application Developer (Founder)

Poople LLC - Chicago, IL — August 2025 to March 2026

- Founded a company to develop and distribute a daily word game website and app
- Developed using React Native and published to Google Play, the App Store, and the web
- Promoted the game online and gained a following of 1,000,000 active users
- Implemented advertising in partnership with Publift to monetize the strong userbase

Mainframe Intern

Wisconsin Department of Transportation - Madison, WI — June 2023 to August 2023

- Worked with a team of five other developers to maintain mainframe applications
- Managed data on the DOT fleet tracking system, responsible for ensuring there were no anomalies
- Learned COBOL and JCL in order to use and maintain applications on the mainframe
- Gave a professional presentation with two other interns on suggestions for increasing security in DevOps

AI Research Intern

DePaul University - Chicago, IL — June 2022 to August 2022

- Evaluated two methods of using machine learning to identify cancerous nodules in lung CT scans
- Conducted a literature review and worked with other teams in the same area of research
- Coauthored a paper and presented it at SPIE 2023

Education

B.S. in Software Engineering

Milwaukee School of Engineering - Milwaukee, WI — August 2021 to December 2024

Member of Tau Beta Pi Engineering Honor Society • Graduated with high honors • GPA 3.86

Skills

Programming Languages
HTML, Python, JavaScript/TypeScript, CSS, SQL, C, C#, Scala, COBOL, Java, C++, JCL

Tools & Frameworks
React.js/React Native, Github, Jira, MySQL, CI/CD, DevOps, Agile

Operating Systems
Windows, Linux, IBM z/OS

Other
Machine Learning, Computer Vision, Large language models (LLMs), Artificial intelligence (AI)
